

Dear members of the legislature,

I write in opposition to SB184. As a public servant myself (teacher, board of education member, and deputy registrar of voters), I have worked in person with hundreds of people for the last two years. My wife is a front line worker as a registered nurse, and she has done the same.

There is no reason to have no excuse absentee voting, especially given where we are with Covid 19. If someone has a legitimate reason as laid out in current state law, they may still vote absentee. But to subvert the constitutional process at this time reeks of partisanship overreach. Voters are paying attention, and we are not happy about where some of you want to take this state. Stop the nonsense, and instead use what we Yankees are supposed to have in abundance: common sense!

Respectfully submitted,
Anthony Kane
